

Smart target have Precise Localization
Using Sound for Sniper

Smart Target for Shooting Training

SPLUS-s

System detect shock wave of flying bullet and
calculate Hitting Point of Target precisely.
The real time shooting result transmitted to
remote display of soldier's side.

Advantages of System

- Safe Shooting: no need to enter shooting line
- Save shooting time: save 93% for 100times 700m
- Hit estimation of non-hitting bullet
- Provide wind direction of Target Point
- Laser target display: No need to attach target area

Performance

Item	SPLUS-s	International Competitor
Detection Range	1,200m (max)	250m
Detection Radius	3~5m (max)	1m
Detection Accuracy	±5.56mm or lower	-
Target Display	Laser Target	Target Board

Application

- Special Force Sniper Training
- Army Sniper Training
- Soldier Shooting Training

- Police Sniper Training
- Fire Extinguisher Test
